

The AIR BRAKE Interactive "General Driver Education Edition" Package

AIR BRAKE *Interactive* General Driver Education Edition is a complete air brake package consisting of a highly detailed, full color, 12-module, 260 page "Instructor's Reference and Presentation Guide", supported by a state-of-the-art software based "CD-ROM Multimedia Presentation". The multimedia presentation includes 44 voice-narrated air brake component and system animations and 80 additional high quality support visuals. The Instructor's Reference and Presentation Guide is both a detailed technical resource for the instructor and a complete point-by-point guide for presenting the program.

Advantages for Driver Training Schools

AIR BRAKE *Interactive* General Driver Education Edition is a comprehensive air brake training program designed to provide truck drivers and heavy equipment operators with a thorough understanding of the design, operation and maintenance of modern heavy vehicle air brake systems, in a single, ready-to-present, training presentation package. Your instructors will deliver a comprehensive and consistent training message, every time! Your students will learn faster and comprehend and retain more information than has ever before been possible! The result is better informed drivers who fully understand the issues associated with air brake inspection, adjustment and maintenance.

Attention

Truck Driver Training School Instructors

The Producers/Developers of the internationally renowned AIR BRAKE *Interactive* training programs are pleased to announce the release of a **NEW** air brake teaching resource, specifically developed for Truck Driver Training Instructors.

Air Brake™ *Interactive*

General Driver Education Edition

Enhanced Training Resources for Professional Air Brake Instructors

General Driver Education Edition

Advantages for the Instructor

AIR BRAKE *Interactive* General Driver Education Edition provides instructors with the most comprehensive and effective teaching tool ever developed for air brake training! The careful structuring of the program ensures a progressive, effective and exceptionally interesting learning experience for your students. Put away your old overhead transparencies or PowerPoint presentations - neither visual presentation method can begin to compete with the awesome visual learning experience provided by AIR BRAKE *Interactive's* voice-narrated technical animations and visuals! AIR BRAKE *Interactive* allows you to provide your students with a more thorough and comprehensive understanding of air brake systems than has ever been possible before.

Advantages for the Student

At the end of the day, the air brake knowledge and skills learned and retained by your students greatly influences both their own safety and that of others with whom they will share the road. The knowledge and skills that your students acquire and retain is also a reflection of your school's standards-of-excellence! AIR BRAKE *Interactive* General Driver Education Edition has been designed to ensure your school's delivery of the highest possible air brake training standards! When your students excel, so does the reputation of your school!

AIR BRAKE *Interactive* General Driver Education Edition

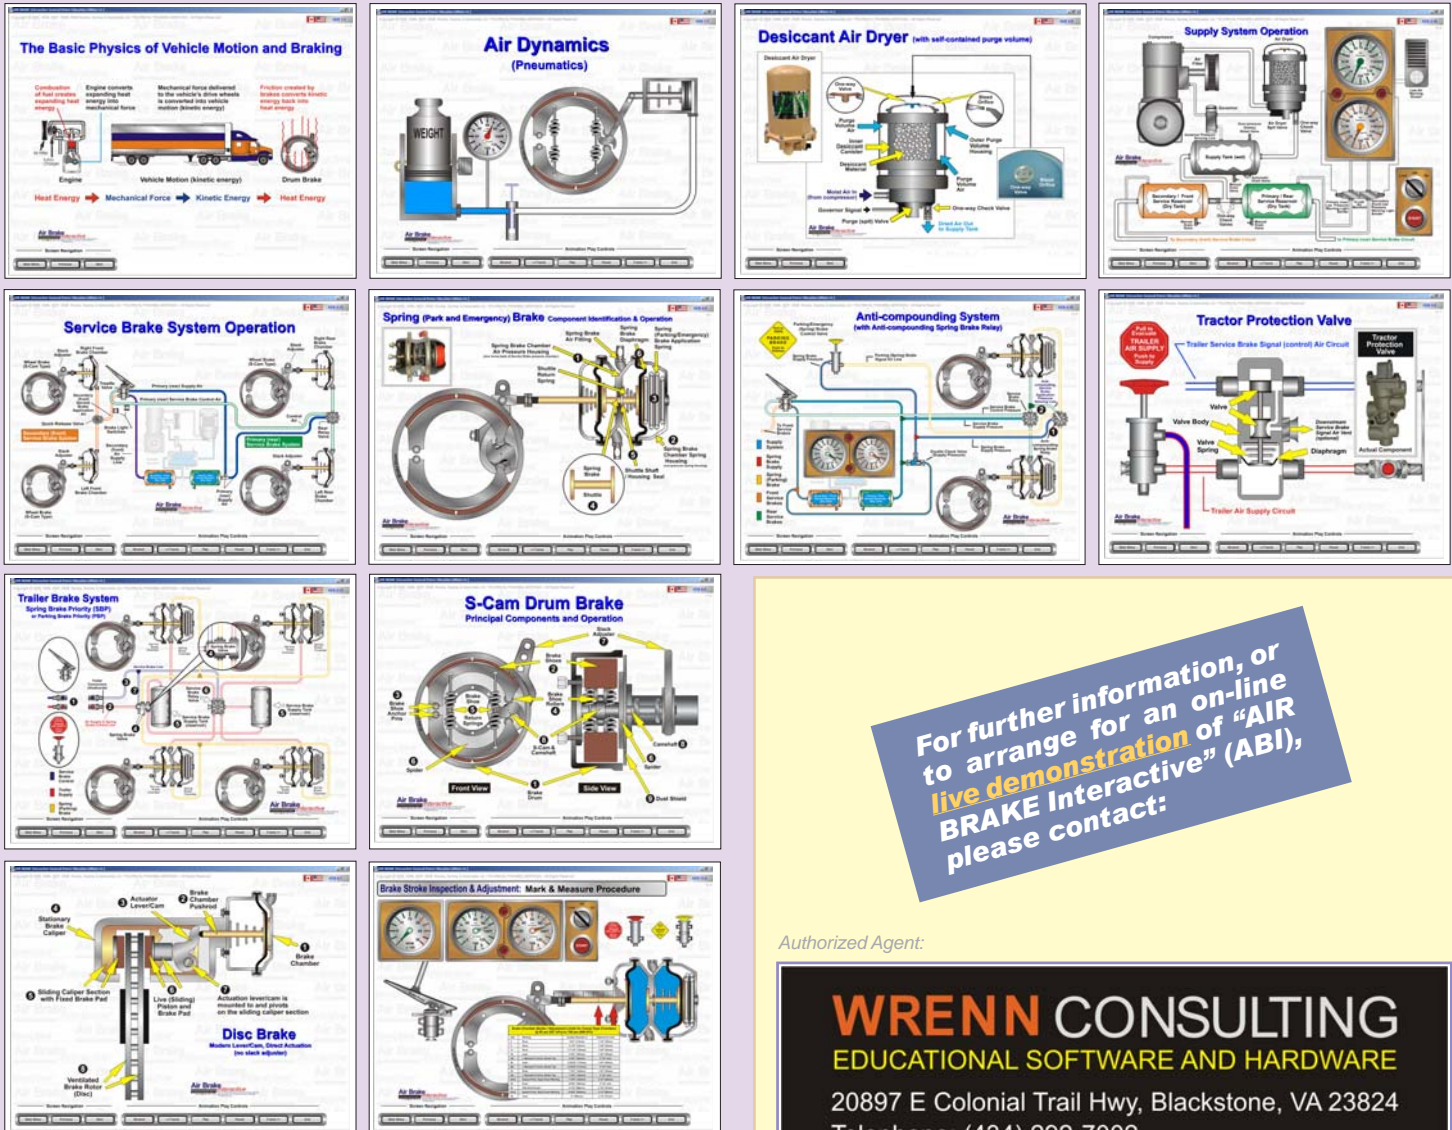

consists of a complete, presentation-ready, air brake teaching resource designed specifically for truck driver training instructors.

Visual Learning - A Powerful Teaching Tool

The key to AIR BRAKE *Interactive*'s exceptional effectiveness is "visual learning". Highly detailed mechanical animations and technical visuals make the normally invisible operation of an air brake system's components and circuits visible and very easily understood.

In short, **WE MAKE the invisible VISIBLE!** The result is vastly improved student comprehension and retention, faster learning, a consistent training message, and better informed drivers. The AIR BRAKE *Interactive* "visual learning experience" is particularly effective for students for whom English is a 2nd language.
